Subject: Aqua Utility rate roll back Attn. Commissioners

I recently read that Aqua is pulling out of states such as Maine and N Y. They are selling their properties in states where the PSC is holding the line on rate increases. They are concentrating and targeting their investments in states where the PSC allows outrages rate increases. These states will allow Aqua it's highest rate of return.
 You are guilty of allowing Aqua's predatory pricing. I don't know if Florida has anti-trust laws. If they do Aqua would be guilty of abusing them. Aqua is looking to invest in states with a friendly regulatory environment. It looks like they found a winner.
